

Entity4

Critical data for reporting on the company, ownership, and legal entities can often be scattered throughout various departments, team members, and applications. Locating and consolidating all of it can be a time-consuming and arduous task.

Entity4 *Solves* Legal Entity Management and Bank Account Management

Entity4 is an award-winning, cloud-based system that combines legal entity management and bank account management—including signatories, subaccounts, and counterparty data—in one secure location for a single source of truth.

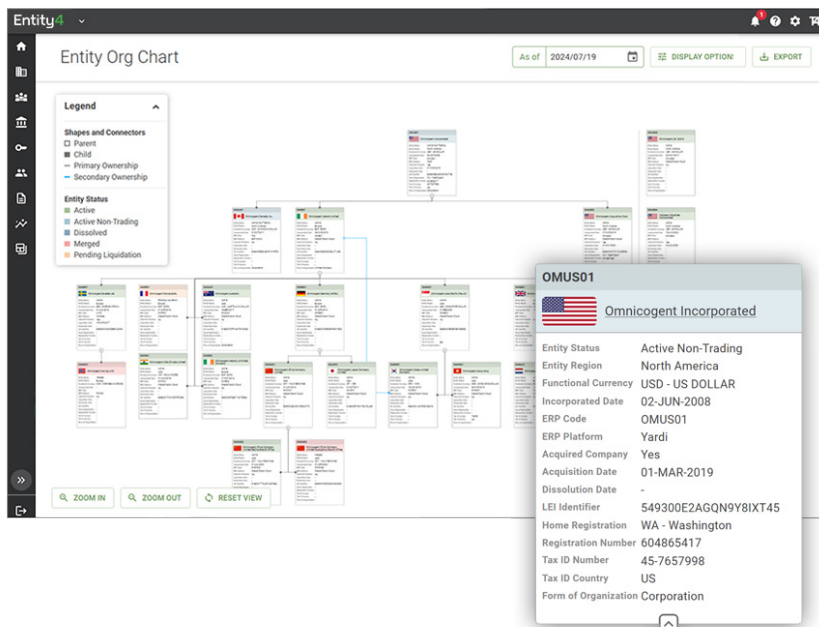

Centralized data management

Custom reports and dashboards

Streamlined compliance

Filings and renewals

Document management

Why Choose Entity4?

A 360° view of data: Get a unified view of your data for all entities and bank accounts in a singular, integrated software solution.

Simplified Reporting: One-touch FBAR and KYC reporting for legal entity and bank account management help streamline the compliance process.

Calendar: Stay on track by keeping important dates, deadlines, renewals, and filings at a glance.

Data Security: Securely store, access, and share all entity-related documents in one place for ease of use.

Periodicity: Easily compare historical and current data.
